Professional Summary

Full-Stack Engineer with **6+ years of experience** specializing in SaaS, AI-powered products, and cloud-native applications. Built and shipped **40+ production systems** for startups and businesses across the US and Europe using Next.js, Node.js, AWS, and modern AI technologies.

Experience

Self-Employed

2023 – Present

Senior Full-Stack Engineer — Contract

Remote, Global Clients

- Delivered 40+ client projects across AI integration, e-commerce, SaaS, and marketplaces for US and European clients; maintained a **4.9/5.0** average satisfaction rating.
- AWS Serverless System:** Extended and maintained a complex AWS serverless architecture with Lambda, EventBridge, SQS, RDS, and CloudFormation for a long-term enterprise client.
- Next.js SaaS Funnel:** Built multilingual SaaS funnel with Firebase Auth, Stripe Elements (Apple/Google Pay), Weglot localization, and Vercel Edge deployment.
- AI-Powered Web App:** Maintained and enhanced a live AI-powered franchise platform using React, Supabase, and AI model integrations (Vercel-hosted).
- Probya Health App Backend:** Built barcode scanning API and ingredient-matching algorithm in Next.js + Supabase for a women's health app.
- Custom Canvas:** Shipped an AI-driven art e-commerce platform using Next.js, Stability AI, Stripe, and Firebase; live at custom-canvas-art.vercel.app.

Acudox

2024 – 2026

Full-Stack Engineer

Remote

- Contributed to a document-intelligence SaaS product, building and maintaining core features for document parsing, user management, and billing.
- Implemented Stripe subscriptions (Connect, Checkout Session, Webhooks, and marketplace payments) supporting 5+ pricing tiers.
- Designed AWS serverless pipelines using Lambda, EventBridge, SQS, SNS, S3, and CloudFormation; reduced infrastructure costs by 30%.
- Integrated OpenAI and IBM APIs for automated document classification and intelligent data extraction.
- Stack:** Next.js, React, Node.js, TypeScript, AWS (Lambda, S3, SQS, SNS, EventBridge, CloudFormation, EC2, RDS, Amplify), Stripe, PostgreSQL, Prisma.

Tutoring Academy

2023 – 2024

Senior Software Engineer (Lead)

Lahore, Pakistan

- Architected and led full-stack development of a real-time tutoring platform serving tutors and students with live video/audio lectures, scheduling, and timetable management.
- Designed and implemented browser-native peer-to-peer video and audio chat using browser media APIs and Socket.io signaling, reducing latency by 40%.
- Built RESTful APIs in Node.js/Express with Azure-hosted PostgreSQL, handling 10K+ daily requests with sub-200ms p99 latency.
- Integrated Azure Functions for serverless background jobs (email notifications via SMTP, availability reminders).
- Led the engineering team; instituted code review processes and CI/CD pipelines via GitHub Actions.
- Stack:** React.js, TypeScript, Node.js, Socket.io, Azure, Tailwind CSS, PostgreSQL, Excalidraw.

Scaylar Technologies

October 2022 – September 2023

Software Engineer

Lahore, Pakistan

- Built real-time collaborative features using Socket.io and Vue.js/Pinia for a B2B SaaS product.
- Developed reusable component libraries with React, MUI, and Tailwind CSS, cutting UI development time by 25%.
- Integrated Azure Static Apps and Azure Functions for serverless deployments with automated CI/CD.
- Stack:** React.js, Next.js, Vue.js, TypeScript, Node.js, Firebase, Azure, Socket.io, Tailwind CSS, MUI.

Rolustech

2020 – 2022

Software Engineer

Lahore, Pakistan

- Worked within a 20+ person engineering team on MERN stack applications for enterprise clients.
- Owned AWS infrastructure setup using Lambda, SQS, SNS, IAM, CloudFormation, and EventBridge to process high-volume event streams.
- Automated build, test, and deployment pipelines via Git workflows, reducing release cycles from weekly to daily.
- Communicated directly with clients to gather requirements and present technical solutions.
- Stack:** React.js, Node.js, Express.js, MongoDB, AWS, Redux, REST APIs.

Key Achievements

- Delivered **40+ production applications** across SaaS, AI, e-commerce, and marketplace domains for international clients.
- Maintained a **4.9/5.0** client satisfaction rating consistently across all contract engagements.
- Led engineering teams, introducing code review practices and CI/CD workflows that improved release velocity.
- Designed and deployed **cloud-native architectures** on AWS (Lambda, SQS, EventBridge, CloudFormation) and Azure, reducing infrastructure costs by up to 30%.
- Built and shipped **AI-powered SaaS products** for US and European clients, integrating OpenAI, Stability AI, and IBM APIs into production systems.
- Architected a **real-time video and audio platform** from scratch using browser-native video tools, supporting live lectures, screen sharing, and peer-to-peer communication at scale.

Notable Projects

Acudocx — Document Intelligence SaaS | *Vue 3, Pinia, AWS, OpenAI, IBM API* | acudocx.com

- Built the core of a document-intelligence platform for automated parsing, classification, and data extraction using AI. Architected AWS serverless backend (Lambda, SQS, EventBridge, S3, RDS) supporting multi-tenant document workflows. Integrated Stripe Connect for marketplace billing across 5+ subscription tiers.

Tutoring Academy — Real-Time Learning Platform | *React, Node.js, Socket.io, Browser Media APIs, Azure, PostgreSQL*

- tutoring-academy.com | learn.tutoring-academy.com — Two-sided marketplace for tutors and students with live browser-based video and audio lectures, subject scheduling, availability management, and an AI-assisted learning module. Led a team of 4 and delivered the full product from architecture to production.

Custom Canvas — AI Art E-Commerce | *Next.js, Firebase, Stripe, Stability AI* | custom-canvas-art.vercel.app

- AI-driven platform that generates personalised scenic artwork for homes and offices using Stability AI. Integrated Stripe subscriptions for tiered purchasing, Firebase for auth and real-time storage, and optimised image rendering pipeline for fast delivery.

Selected Client Websites | *HTML5, CSS3, JavaScript, Responsive Design*

- summitpropertygroup.ca, umbrellahomecare.ca, lakeviewdentalcentre.com, drschlee.ca, brooksindustrialmetals.com, iniskim.com — Delivered pixel-perfect, fully responsive production websites for Canadian businesses across real estate, healthcare, and industrial sectors.

Technical Skills

Languages & Frameworks: JavaScript (ES2022+), TypeScript; React.js, Next.js, Vue.js, Node.js, Express.js

AI & Integrations: OpenAI API, Stability AI, IBM API; Stripe (Connect, Subscriptions, Webhooks, Marketplace, Express Checkout); Clerk Auth

Cloud & Infrastructure: AWS (Lambda, S3, SQS, SNS, EventBridge, CloudFormation, EC2, RDS, Amplify, Route53, SES); Azure (Functions, Static Apps, SQL); Vercel; Docker; GitHub Actions CI/CD

Architecture & System Design: Serverless architecture, event-driven systems, microservices, REST & GraphQL API design, multi-tenant SaaS design, real-time systems (WebSockets, browser media APIs), CDN and edge deployment, database schema design (relational & NoSQL), Row-Level Security (RLS), caching strategies

Databases & ORM: PostgreSQL, MySQL, MongoDB, Firebase, Supabase (RLS, Auth, Edge Functions, Storage); Prisma, Sequelize, TypeORM, Drizzle

Real-Time & Protocols: Socket.io, WebRTC, REST APIs, GraphQL, WebSockets

Styling: Tailwind CSS, MUI, styled-components, Sass, Vuetify, Bootstrap

State Management: Redux, Redux Toolkit, Redux Saga, Zustand, Pinia, Context API

Automation & Tools: n8n, Retool, Git/GitHub, VS Code, Postman, Jira, Figma

Remote Collaboration

- Fluent English communication — written and verbal — with a strong track record of clear, concise technical documentation and async updates.
- 5+ years of experience working directly with US and European stakeholders across multiple time zones; consistently praised for responsiveness and proactive communication.
- Comfortable leading technical discussions, architecture reviews, and client-facing meetings independently.
- Experienced using collaborative tooling including GitHub, Jira, Slack, Figma, Notion, and Retool in distributed team environments.
- Proven ability to self-manage deliverables, set expectations early, and surface blockers before they become delays.

Education

Lahore Garrison University

Sep. 2017 – May 2021

Bachelor of Science (Honours) in Computer Science — CGPA: 3.70/4.00

Lahore, Pakistan

- Relevant coursework: Data Structures, Algorithms Analysis, Artificial Intelligence, Database Management, Systems Programming, Internet Technology, Computer Architecture.
